GUARDING THE FUTURE

These heroes do the dangerous work for us.
We must supply the best protection for them.

ABOUT

A-TEKS & AKBULUT

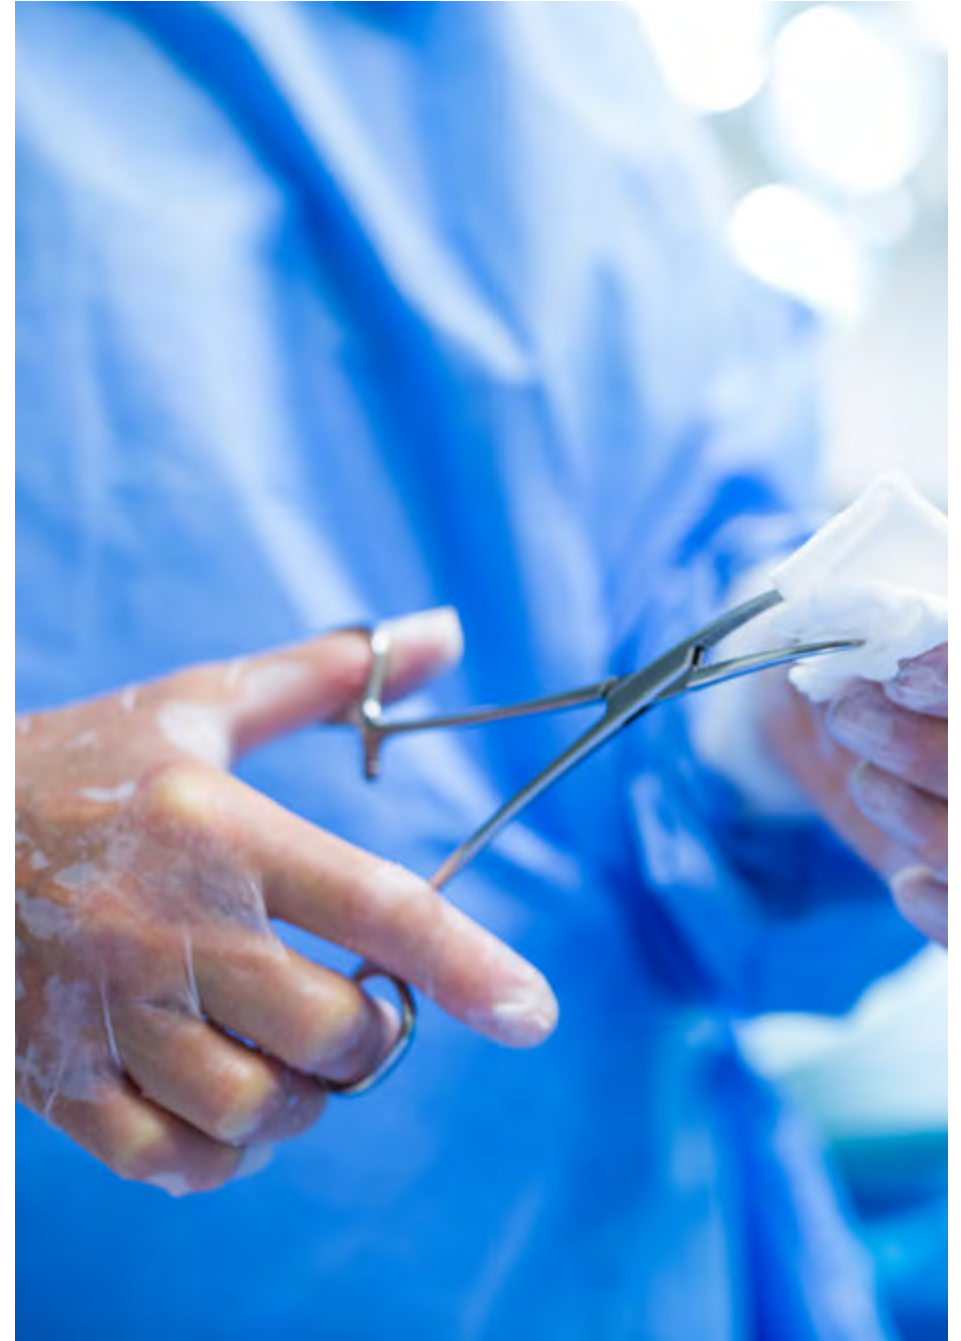

A-TEKS Engineering & Textile was founded in Adana, Turkey at 2005.

The company was directed by Zeydan Karalar who was the former manager of Cukobirlik (one of the biggest and the oldest Textile factory in Turkey, with more than 10.000 employees)for six years, than who became a CEO and General Manager of the Okan Textile which is one of the biggest factory in 2000's. Okan Textile also had another factory in Astana established by a team lead by Zeydan Karalar.

After decades with multifunctional experiences, A-TEKS was founded by Zeydan Karalar, he has ran his own company until he became a mayor. He is now the Mayor of Adana City, but still is the honorary chairman of the company. A-TEKS continues working with very high quality standarts. The company has Three partners and all of them are high - educated engineers.

Akbulut is one of the leaders in the area of textile. The company was founded at 1988. Since then, they have been manufacturing on knitted textile products for global brands, have exported to various countries in Europe, especially England, and overseas. Akbulut Textile makes manufacturing for the best brands all around the world.

Akbulut Textile is also brought the famous Sport Wear company Hummel to Turkey. They are still the partner and shareholder of Hummel - Turkey.

SURGICAL & ISOLATION GOWNS

Our surgical and isolation gowns are produced with high quality standarts. The fabric we use is one of the best, and this is stated by the laboratory test results which can be shared if asked. After getting the best fabrics, we made each gown very carefully. Our experienced and well educated workers made each gowns by catching the necessary standarts demanded by our customers. Our aim is to catch necessary standart for both critical regions and seams.

BEST PROTECTION

Since our gowns meets ANSI / AAMI PB70 : 2012, our gowns protection levels from one to four. Up to the conditions of usage, the necessary protection Level can be selected easily and it can be verified by global standards. For the best protection, we can declare that our isolation gowns are the best.

VERSATILE

Our gown designs are flexible upon customer needs. For instance, the belt can be one or it can be doubled. It can be on the back or front. The colours, of course, can be white, blue or green. The seam colour also can be modified. Velcro or wire on the neck is optional. Also, velcro size is evdn manageable.

WORLD WIDE QUALITY

Our quality is validated by global standarts. Each gowns meets with ANSI/AAMI PB70 : 2012. Every gown types are tested separately for each customer to sustain our quality. Both production method and fabrics are adjusted to ensure the best quality.

Sterilization : Three option Non - Sterile
Steam Sterilization
EO Sterilization

Surgical or Isolation : Both are manufactured

Size : M to XL

Note : The design can be moderated according to customer needs.

Our gowns are validated by FDA and CE.

STERILIZATION

Sterilization can be made two distinct ways: One with steam, and the other one is Ethylen Oxide.

Simply, we use the sterilization effect of relatively high temperature of the steam at the first method and EO chemical is used for the second method

Steam sterilization lasts 6 months, while EO Sterilization lasts 5 years (if packed is closed for both).

The second method is more expensive. Thus we suggest the first method for customer who buys the gowns for faster use. If the buyer plans to stock it, then five year sterilization is suggested.

YES!
WE PRODUCE
HQ MASKS:)

*The superheroes
always wear mask!*

In the time of today, we have to protect ourselves but we we should protect also other people. Thus, everyone should wear their mask. Like superheroes, we can save many lives with using the mask.

Benefit of using mask is stated by scientific studies. However, there are many non-protective masks which make you think that you are safe. Since they are unqualified, they are more dangerous. We are producing very protective ones with high quality seams and fabric.

Remember, the quality comes first. Since 1988, we offer the quality with reasonable prices.
